THE FREE AUDIT

See what your last six months of brand deals were really worth

Send us your recent deals. A person reads every one and shows you where the rate, the terms or the payment fell short, and what to ask for next time. It is free, and you keep the results whether or not you work with us.

What we check

Rates

How each fee lines up with the work and the rights it included.

Usage and exclusivity

Rights you gave away, and promises not to work with others that were never priced.

Payment terms

Net 30, 60 or 90, late payers, and any invoice still unpaid.

Patterns

Which brands pay well, which pay late, and which are worth pitching again.

What a finding looks like

Example only, not a real creator

THE DEAL

One skincare post and two stories. Six months of paid ad usage included. Payment net 60.

WHAT WE'D FLAG

Paid usage was bundled in for free, and net 60 left the money out for two months. Next time: price usage separately and ask for net 30.

How it works

1. Send your deals

Offers, contracts and invoices from the last six months. Screenshots are fine.

2. We review them

A person reads every deal and checks it against the list above.

3. You get the audit

A plain summary of what we found and what to change. It is yours to keep.

What it costs

The audit costs nothing. If you want help after that, Deal Desk is 20% of every deal we work on, with no monthly fee. Brands pay you directly, and we never handle your money.
